## EDUCATION

**GEORGIA INSTITUTE OF TECHNOLOGY** Atlanta, GA

**MS in Computer Science (Machine Learning Concentration) | BS in Industrial Engineering**:

*Honors:* Summa Cum Laude, Top Capstone Project for 2023, Teaching Assistant-Optimization

*Relevant Coursework:* Machine Learning, Statistical Modeling, Probability & Statistics, Optimization, Data Structures & Algorithms

## EXPERIENCE

**CAPITAL ONE** Mclean, VA

***Business Manager - Partnerships (Auto Finance)*** *Mar 2026 – Present*

- **Led a high-impact, multi-state credit policy expansion test** for a strategic lending partner using Python, SQL, and Policy Engine to revise LTV, FE, BE, PTI, payment, and term counter limits as well as approval limits to target 2.5–3x funded volume growth ahead of a national rollout projected to generate up to ~$100M in incremental NPV and ~$3B in originations
- **Coordinated cross-functional test implementation and post-launch performance monitoring** across sales, legal, product, operations, and technology teams, partnering with executive leadership to evaluate applicant mix, approval rates, funded volume, credit risk, and profitability, refine credit policy limits, and inform the broader national rollout
- **Managed interns and new hires,** leading onboarding, providing technical guidance, assigning responsibilities, and overseeing project execution and key analytical decisions within the Partnerships Portfolio

***Senior Associate - Prime Skew (Auto Finance)*** *Aug 2025 – Mar 2026*

- **Developed and launched a differentiated credit decisioning strategy** projected to generate ~$20M in incremental NPV across Prime-Skew dealerships representing 8% of Capital One's dealer network, optimizing approval targets, pricing, and counter limits to address distinct customer-selection dynamics in historically underpenetrated segments.
- **Productionized an XG Boost Model** leveraging market and dealer-level attributes not captured in existing approval and risk models to identify rate-insensitive customer segments and implement risk-based pricing adjustments, contributing ~$7M of the projected $20M NPV uplift.

***Senior Associate - Dealer Management (Auto Finance)*** *Aug 2024 – Aug 2025*

- **Built an automated Auto Finance reporting suite using SQL, dbt, and Tableau** to monitor portfolio volume, credit losses, valuations, and consumer-, deal-, and risk-level KPIs across key segmentations, enabling executive leadership to evaluate portfolio performance and inform credit policy and risk strategy decisions
- **Automated quarterly reporting workflows using SQL and Python** for data analysis, KPI calculations, and visualizations, integrating automated Google Sheets and Slides updates to eliminate manual processes and save days of manual work quarterly.

***Associate - Credit Card Innovation*** *Aug 2023 – Aug 2024*

- **Enhanced a production credit risk analytics repository using Python, SQL, and YAML** to generate time-series reports comparing expected credit risk against actual portfolio performance, implementing model enhancements, bug fixes, and workflow improvements through testing and deployment.
- **Analyzed and presented model-driven credit risk insights** to stakeholders to inform credit card policy decisions, conducting follow-up analysis with Python, SQL, and Excel to evaluate portfolio performance and emerging risk trends

**EDUTOURISM INC.** Atlanta, GA

***Full Stack Developer (Part-Time)*** *Aug 2021 – Dec 2022*

- **Contributed to the development of a full-stack educational tourism platform** at an early-stage startup, building front-end interfaces and back-end functionality while supporting database management
- **Developed and integrated backend APIs and services** to support user authentication, data processing, and database operations across the web application

**AMAZON, SOUTHWEST AIRLINES, WARNER BROS. DISCOVERY** Atlanta, GA

***Business Analyst, Fleet Analyst, Data Analyst (All Internships)*** Jan 2022 – Dec 2022

- **Amazon**: **Built an automated reporting suite using Amazon Redshift and QuickSight** to integrate production tables and track training completion, participation, and operational performance metrics
- **Southwest Airlines: Analyzed fleet utilization, ticket pricing, and fuel-consumption data** using SQL in Snowflake for data extraction and Python to identify opportunities for improved aircraft efficiency and route profitability
- **Warner Bros. Discovery: Developed a reporting suite using SQL and Tableau** to track newsletter performance across open rates, click-through rates, subscriber growth, engagement, and unsubscribe trends

## SKILLS

***Analytics Tools***: SQL, Python (Pandas, Seaborn, Scikit-learn, NumPy, Matplotlib), R, Java, MATLAB, VBA, Excel, Tableau, Power BI, Snowflake, dbt, AWS, Oracle, Redshift, Git, ETL

***Credit Risk & Data Science****:* Credit Risk Modeling, Credit Policy Strategy, Risk Based Pricing, Predictive Modeling, Machine Learning

***Strategic Skills:*** Strategic Problem Solving, Cross Functional Leadership, Project Management, Change Management, Executive Communication, Critical Thinking, Hypothesis Driven Assessment, Human Centered Design
