EDUCATION

Georgia Institute of Technology **Atlanta, GA**
Masters in Computer Science (Machine Learning concentration) Dec 2026
Cumulative Masters GPA: 3.5/4.0
Bachelor in Industrial Engineering May 2023
Cumulative Undergraduate GPA: 3.7/4.0
Relevant Courses: Data Input and Manipulation, Probability and Statistics, Machine Learning, Data Structures, Algorithms

WORK EXPERIENCE

Capital One **Mclean, VA**
Senior Associate- Partnerships (Auto Finance) Mar.2026 – Present

- Led a high-priority, multi-state credit policy expansion test for a strategic lending partner using Python, SQL, and Policy Engine to revise LTV, FE, BE, PTI, payment, and term counter limits, collaborating with strategy and engineering teams to target 2.5–3x funded volume growth ahead of a national rollout projected to generate up to ~$100M in incremental NPV and ~$3B in originations.
- Coordinated and validated the test release across sales, legal, product, operations, and technology teams, then led ongoing post-launch monitoring with executive leaders across applicant mix, approvals, funded volume, credit risk, and profitability to refine expansion limits and inform broader national rollout.

Senior Associate- Prime Skew (Auto Finance) Aug.2025 – Mar. 2026

- Launched a differentiated credit decisioning strategy projected to increase NPV by ~$20M across Prime-Skew dealerships representing 12% of all dealers, where Capital One has historically held a lower market share, by adjusting targets, approval limits, pricing, and counter limits to reflect distinct customer-selection dynamics.
- Productionized an XGBoost model for prime skew dealers using market and dealer-level attributes not currently utilized in our base approval and risk models to identify rate-insensitive customer segments and apply risk-based pricing adjustments, accounting for ~$7M of the projected $20M NPV uplift.

Senior Associate- Dealer Management (Auto Finance) Aug.2024 – Aug 2025.

- Built an automated Auto Finance reporting suite using SQL, dbt, and Tableau, with KPIs covering volume, losses, valuations, quarterly processes, consumer, deal, and risk level metrics across key segmentations to support executive leaders in monthly portfolio strategy, monitoring and credit policy decisions.
- Automated quarterly reporting workflows using dbt, SQL, and Python for data analysis, metric calculations, and visualization, integrating automated Google Sheets and Slides updates to eliminate manual processes and save days of work each quarter.

Associate- Credit Card Innovation Aug.2023 – Aug.2024

- Contributed to a production analytics repository using Python (pandas, NumPy, scikit-learn, Matplotlib), SQL, and YAML to generate time-series reports comparing expected credit risk with actual portfolio performance, implementing model enhancements, bug fixes, and workflow improvements through testing and deployment.
- Synthesized and presented model-driven insights from the reports to stakeholders, influencing credit card policy decisions, and conducted follow-up analysis with Python, SQL and Excel

Amazon, Southwest Airlines, Warner Bros. Discovery **Atlanta,GA**
Business Analyst, Fleet Analyst, Data Analyst (All Internships) Jan .2022 – Dec.2022

- Amazon: Built an automated training reporting suite using Redshift and QuickSight, integrating production tables to track completion, participation, and operational performance metrics.
- Southwest Airlines: Analyzed fleet utilization, ticket pricing, and fuel-consumption data using SQL, Python, and Snowflake to identify opportunities for improved aircraft efficiency and route profitability.
- Warner Bros. Discovery: Developed a SQL and Tableau reporting suite to monitor newsletter performance, including open rates, click-through rates, subscriber growth, engagement, and unsubscribe trends.

ADDITIONAL INFORMATION

Skills: SQL, Python, Statistical Analysis, Predictive Modeling, Credit Risk Modeling, Tableau, Snowflake, dbt, Java, MATLAB, Machine Learning**,** Git, CAD, ETL, AWS Certified, Overwatch, Valorant, Rugby, Eating
